

PROJECT MANAGEMENT

Practical Approach to Project Management Process

CIDB

www.zohlgroupp.com

COURSE CODE: NT-CD-12

LEVEL: Basic to Intermediate

LANGUAGE: Bahasa & English

OVERVIEW

The Project management in the modern sense began in the early 1950s, although it has its roots further back in the latter years of the 19th century. The driver for project management was businesses realizing the benefits of organizing work around projects and the critical need to communicate and co-ordinate work across departments and professions. Many organizations don't employ full-time project managers and it is common to pull together a project team to meet a specific need. While many people may not have formal skills in a project methodology, taking a role in a project team is an excellent learning opportunity and can improve a person's career profile.

OBJECTIVES

- Participant will be able manage their project systematically.
- Participants will gain understanding on definition of project and project management.
- Participants will gain understanding on project scope management, project time management, and also project cost management.
- Participants will know what is project procurement management and also project stakeholder management
- Participant will get clear explanation on the need for ethics in project management.

COURSE BENEFITS

- Manage a project through each stage of the project management life cycle
- Document the needs and priorities of key stakeholders
- Develop an execution strategy that will fulfill stakeholders' expectations
- Develop a project plan that balances scope, time, cost, and risk
- Assess project complexity and analyze scope to a suitable degree of granularity
- Establish project controls to ensure a successful outcome
- Monitor project activities and effectively assess progress
- Report status and performance efficiently and effectively
- Collect lessons learned and create a project archive that contributes to an organization's experience base
